EDUCATION

Azim Premji University, Bengaluru

2024–2026

M.A. Economics

Sir Parashurambhau College, Pune

2021–2024

B.A. Economics

EXPERIENCE

Research Assistant

Jun 2026 – Jul 2026

Centre for Policy Research (CPR), New Delhi

Remote

- Collected, cleaned, and analyzed large-scale cross-national public opinion survey data using **R**, constructing harmonized datasets to examine political attitudes, democratic preferences, and trust in public institutions.
- Conducted comprehensive literature reviews on political parties, electoral competition, public opinion, and comparative political economy, synthesizing evidence from academic research.
- Performed exploratory data analysis, statistical summarization, and data visualization in **R**, producing research outputs on global political behavior and party systems.
- Developed reproducible data-processing and analysis workflows, ensuring transparency, efficiency, and replicability in empirical research.

Master's Thesis

Mar 2025 – May 2026

Azim Premji University

Bengaluru, India

- Examined the consequences of SC/ST candidates' presence in unreserved constituencies on village-level socio-economic outcomes using Staggered Difference-in-Differences (DiD), Propensity Score Matching (PSM), and Linear Probability Models (LPM).
- Constructed a village-level panel dataset for Maharashtra by integrating election data from the Trivedi Centre for Political Data (TCPD), delimitation records, and SHRUG data.
- Cleaned and processed large datasets using **R** and **Stata**, and developed spatial layers and maps using **GIS**.
- Found modest but statistically significant effects on literacy rates and strong positive effects on health facilities, water accessibility, and road infrastructure.

Field Research Intern

Dec 2024

Azim Premji University

Bengaluru, India

- Assisted in a socio-economic field study examining village governance, labour migration, and caste dynamics.
- Conducted more than 20 personal interviews with key village stakeholders including the panchayat chairman, ward members, ASHA workers, teachers, students, migrants, and small business owners.
- Conducted socio-economic mapping and prepared a field report linking insights to labour migration and caste structures.

Pilot Surveyor

Oct 2022 – Nov 2022

Columbia University

Pune, India

- Worked on *Project Ghar Doghanche – Empowering Women with Property Rights* under the supervision of PhD candidate Akanksha Vardani.
- Conducted pilot surveys and interviews with women and their husbands across 14 villages in Pune district.
- Collected primary data on property rights, domestic violence, household consumption patterns, intra-household bargaining power, and related socio-economic outcomes.

SKILLS

Programming: R (Advanced), Stata (Advanced), Python (Basic), QGIS (Intermediate), LaTeX (Advanced)

Statistical Techniques: Causal Inference, Panel Data Analysis, Time Series Analysis, Machine Learning

Data Collection: Web Scraping, SurveyCTO (Basic)

Other Tools: Excel, Microsoft PowerPoint, Canva

Languages: English, Marathi, Hindi

PROJECTS

Determinants of Household Income: Evidence from IHDS (2005–06, 2011–12)

- Analyzed the Indian Human Development Survey (IHDS) panel dataset using **Stata** to examine the determinants of household income across India.
- Estimated regression models to assess the impact of education, household assets, and government benefits on income levels.
- Found that female education had a stronger association with household income growth than male education.
- Visualized shifts in the income distribution, highlighting growth in the middle-income population and a decline in the share of households classified as poor.

Country Report: Political Economy of Turkey (1960–2025)

- Developed a comprehensive assessment of Turkey's political economy and economic development from 1960 to 2025.
- Conducted growth accounting and structural transformation analysis using the McMillan et al. (2017) decomposition framework.
- Compiled and analyzed time-series data from the World Development Indicators (WDI) using **R** to examine trends in GDP, GDP per capita, and sectoral employment.
- Evaluated the role of structural change, labor reallocation, and sectoral productivity in shaping Turkey's long-run economic growth.
